IN CLASS YOU TRAINED

Check what you've got

You show what you understand and where it's still fuzzy. Then we both know where to go next.

How to do it at home, with this week's material

1. Do the question from the lesson that looks most like a test question. Without help.
2. For each part mark: I get it · not sure · not yet. Honestly, not hopefully.
3. Take your «not yet» to class. That is your question for tomorrow.
