

IN CLASS YOU TRAINED

Use it somewhere new

You use what you know in a situation you haven't seen before. That's exactly how a test asks it.

How to do it at home, with this week's material

1. Find one new example where this also applies: at home, in the news, in another subject.
2. Explain why it is the same. Which rule from the lesson is in it?
3. Think of an example where it does not apply, and why not. That is the limit of the rule.

My new example

Why it is the same

Where it does not apply, and why not

How did it go? ☐ yes ☐ partly ☐ no
